Amazon Machine Image (AMI)

Microsoft Windows Server 2025 Base

ami-0a581b4519125d47 (x86_64)

Free tier eligible

Description

Microsoft Windows 2025 Datacenter edition, [English]

Microsoft Windows Server 2025 Full Locale English AMI provided by Amazon

Architecture	AMI ID	Public Date	Username
x86_64 (opt)	ami-0a581b4519125d47	2025-08-15	Administrator

Instance type [info](#) [Get advice](#)

t3.micro

2 vCPU 1 GiB Memory

Current generation: true

On-Demand Linux base pricing: 0.0112 USD per hour

Free tier eligible

t3.xlarge

8 vCPU 32 GiB Memory

Current generation: true

On-Demand Linux base pricing: 0.0344 USD per hour

Free tier eligible

Additional costs apply for AMIs with pre-installed software

Compare instance types

Key pair (login) [info](#)

You can use a key pair to securely connect to your instance. Ensure that you have access to the selected key pair before you launch the instance.

Key pair name - required

Bharath_key

Create new key pair

For Windows instances, you must use a key pair to decrypt the administrator password. You then use the decrypted password to connect to your instance.

Network settings [info](#)

Network

vpc-09b115aef0a20cc7

Subnet

No preference (Default subnet in any availability zone)

Auto-assign public IP

Enable

Firewall (security group)

Create security group

Select existing security group

Allow RDP traffic from

Anywhere (0.0.0.0/0)

Allow HTTPS traffic from the internet

To set up an endpoint, for example when creating a web server

Allow HTTP traffic from the internet

To set up an endpoint, for example when creating a web server

Rules with source of 0.0.0.0/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only.

Launch instance

View code

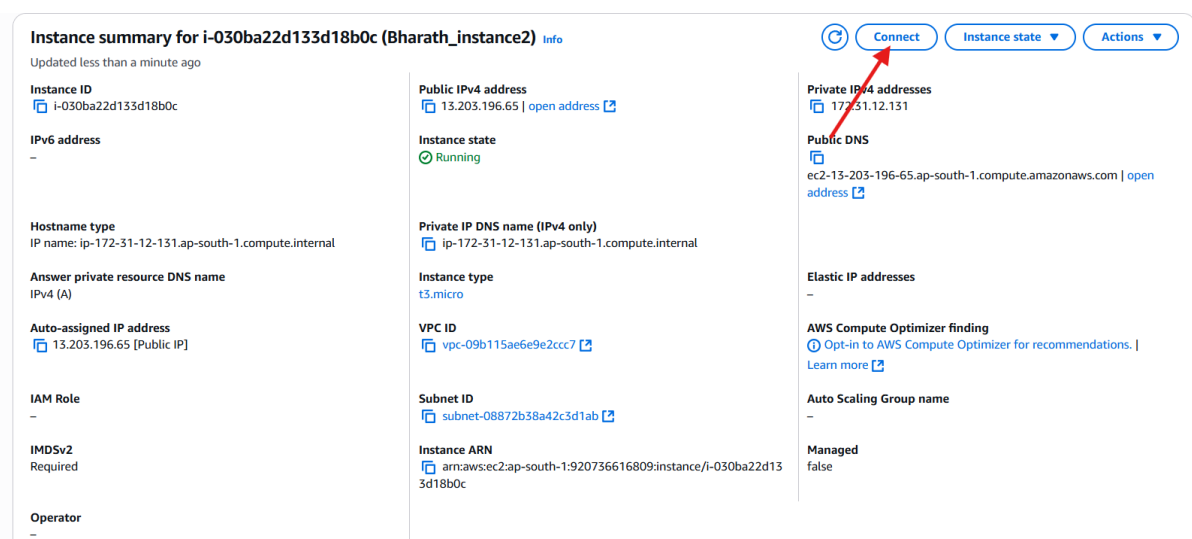

Wait for it to launch

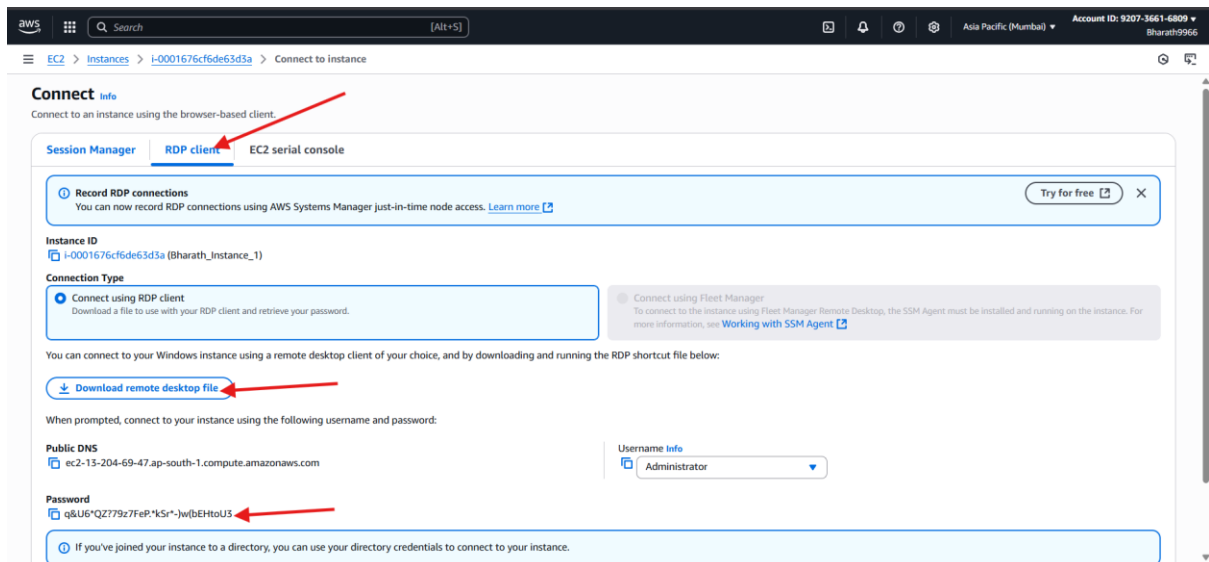

After that you will see your instance click on it

Here you can see detailed overview of your instance now Click on connect

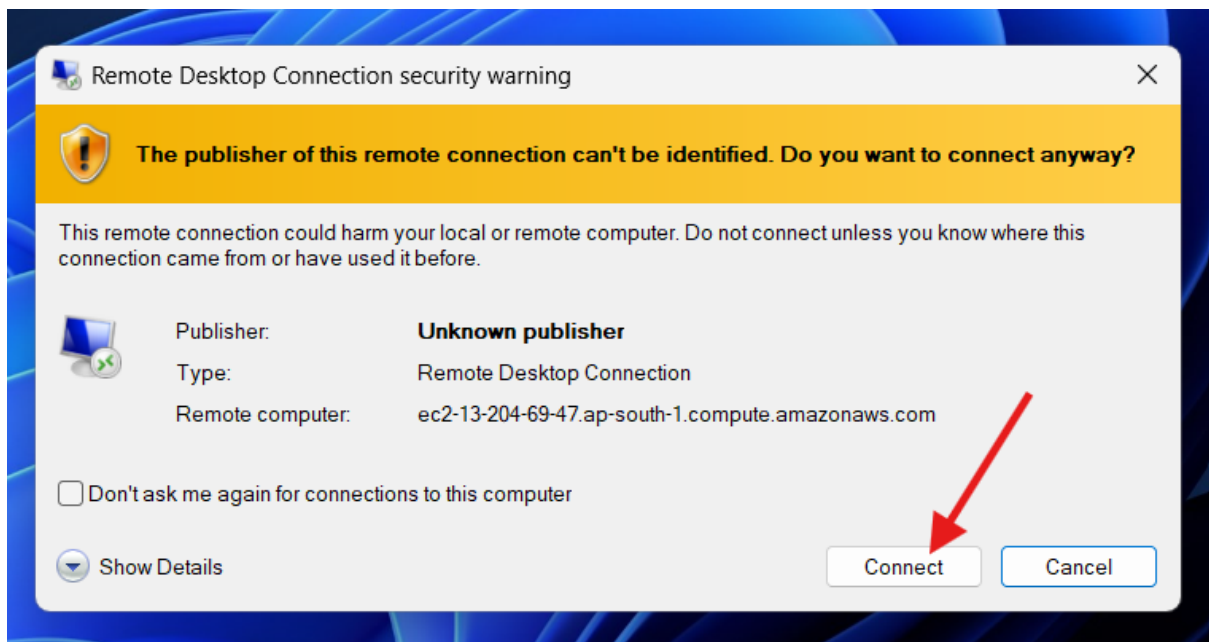

Select RDP client and download remote desktop file and in pass word decrypt your .prem file downloaded earlier by uploading it save your password it's needed

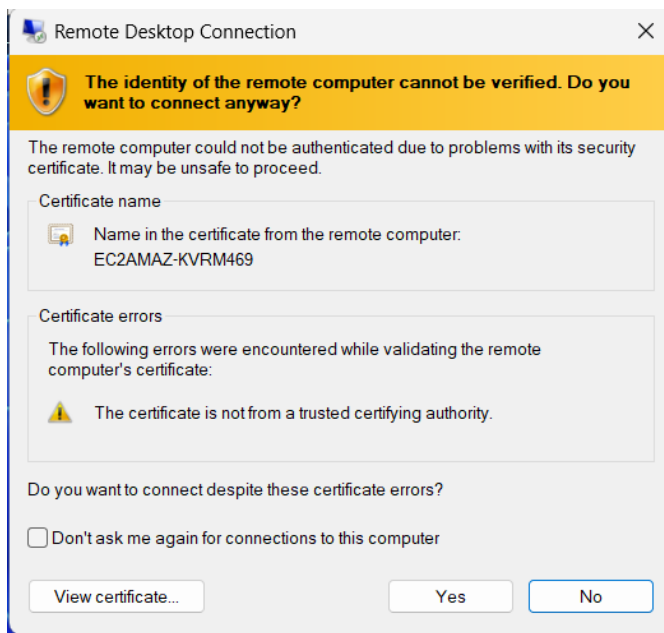

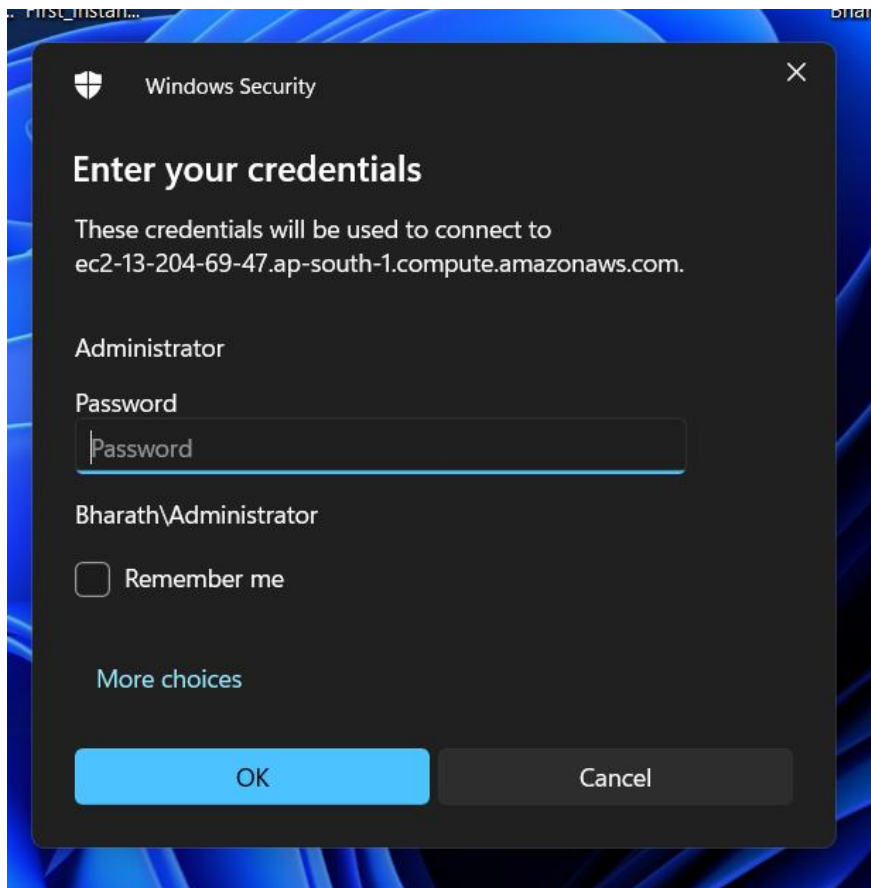

double click on the .rdp file you have downloaded

Then click on connect

Now use the decrypted password from earlier

Click on yes to get cone t after verifying your certificate name

You will see your VM getting loaded
