

Install Virtual machine on VMware EXSi, Create Virtual switch and configure Storage-25

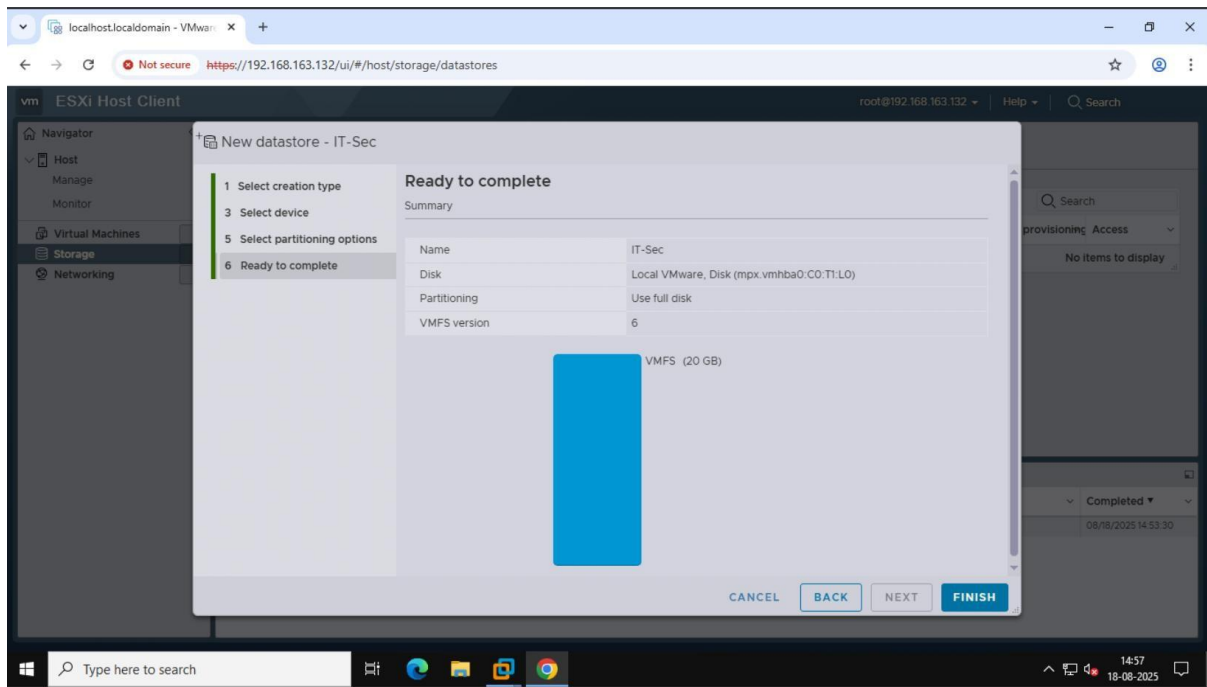

Create a virtual disk for VM inside VMware software

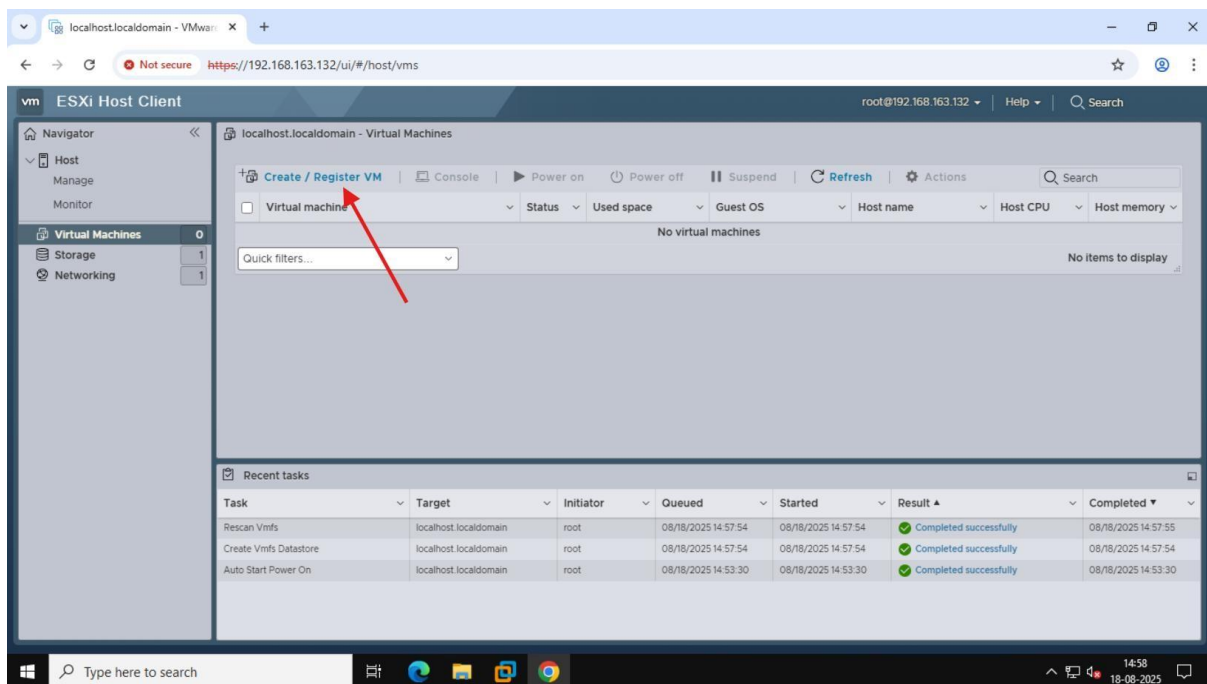

Now go to the web host client and in storages create a storage resource like IT-Sec

After that go into the VM and click on Create / Register VM and create any os VM

Here we have selected windows as OS family and windows 10 (32-bit)

New virtual machine - ESXi 8 (ESXi 8.0 U2 virtual machine)

1 Select creation type

4 Select a name and guest OS

5 Select storage

6 Customize settings

10 Ready to complete

Select a name and guest OS

Specify a unique name and OS

Name

Virtual machine names can contain up to 80 characters and they must be unique within each ESXi instance.

Identifying the guest operating system here allows the wizard to provide the appropriate defaults for the operating system installation.

Compatibility

Guest OS family

Guest OS version
